Ford Mustang Rally Stripe Kit 4 - Convertible Parts List ATD-FRDMSTNGGRPH104

Due to compound curves found on the Hood Front, we suggest starting application of the Hood piece at the rear of the Hood. Once properly aligned, proceed to set the rear with a firm squeegee action. Having someone at the front of the Hood holding the Hood piece, have them firmly "tug" at the graphic as you squeegee in an arcing side to side motion towards the front. As you get closer to the front, increased squeegee pressure assists in laying the edges in place.

Suggested starting area

Due to the difficulty in the installation of a one (1) piece Rear Lid piece, two (2) pieces are required for this installation, thereby leaving a seam where the two (2) pieces meet. For correct installation, we suggest applying the Rear Lid Rear piece first, followed by the Rear Lid Top. This will allow the Top to overlap the Rear (approx. 1/8" [3.175mm]).

While most pieces we provide are precut, we decided to leave the Third Brake light area solid which will allow easier placement as well as the use of this kit on Mustang Rear Lids that do not have the Third Brake light. Simply trim the piece after installation, using the edge of the light as a guide.
